## F-Print P75 SB

### PRODUCT DESCRIPTION

F-Print P75 SB is a high-performance self-adhesive film designed for large-format digital printing. Ideal for medium to long-term indoor and outdoor applications, this versatile product is perfect for flat and slightly curved surfaces. Made from polymeric vinyl, it is UV stabilized for lasting color retention and printed using solvent, eco-solvent, latex, and UV inkjet printing technologies.

### APPLICATIONS

- Medium to long term outdoor advertising: trains, cars, bus, trucks, ...
- Medium to long term indoor advertising: shops and malls, airport terminals, ...
- Flat and curved substrates

### BENEFITS

#### Exceptional Durability

F-Print P75 SB offers up to 7 years of color stability, making it perfect for long-term outdoor advertising.

#### Print Versatility

F-Print P75 SB is specially developed to be printed with solvent, eco-solvent, latex, and UV inkjet printing presses, delivering crisp, high-quality graphics every time.

#### Strong Adhesion

The permanent solvent-based adhesive ensures superior adhesion to a wide range of substrates, available in both clear and grey formulations for extra opacity.

#### Smooth Application

With a 140 g/m<sup>2</sup> PE coated kraft paper or micro-embossed release liner, F-Print P75 SB ensures easy handling, excellent planarity, and superior printing results.

#### REACH & RoHS Compliant

This product is fully compliant with REACH and RoHS regulations, ensuring environmental safety and sustainability.
